Borrowed Years...

We have borrowed the Earth from our grand children, we have to protect their rights...

Dear Guests,

We are consuming Earth's resources at a dizzying rate. Our grandchildren are demanding a livable future. For sustainability of human life on Earth, in every step we have to reduce our environmental footprints, together!

As we are trying to provide our services for your best comfort and quality expectations, we rely on your environmental understanding, responsibility and cooperation. We would like to note a few sustainability issues:

- Hotel **energy, water consumption** is more than in our houses.
- **Every drop of water is precious for life.** Please use sparingly!
- **High power equipment will not operate on room power outlets.** Please be careful not to cause a break-down.
- We are striving to provide all the carefully selected bed and bathroom **textiles** as fresh and as clean as new. **Please use carefully and do not stain** them.
- **Bedding and bathroom textiles will be changed every three days** to reduce water and detergents use. Please check **extra list for earlier change requests**...
- **Dry your wet towels by hanging on the clothesline** and do not put them on the floor.

Breakfast	08:30–11:30
